SIGNAL FOUR ANALYTICS

RELEASE NOTES Version 3.2.1 / Apr 1, 2024

Hotfix release correcting bugs found upon release of version 3.2.0.

IMPROVEMENTS

- Adjust size of crash type symbology to more closely match previous event points
- Add popup message in the event of a custom area exceeding allowable size for export

BUGS SQUASHED

- Fix bug preventing dot roadway query edits
- Resolve issue preventing map from correctly displaying dot roadways for existing queries
- Sets maximum allowable vertices for exports involving custom areas to 500
