

RELEASE NOTES Version 3.5.0 / Sep 13, 2024

This release focused on refining the new features released in version 3.4.0

IMPROVEMENTS

- New layout for map popups providing uniform style
- Crash diagram outlines update as crash point color scheme changes
- Improved ux for opening and closing crash diagrams
- Updated crash point symbology to better display available crash diagrams
- Crash and citation charts scroll within their containers
- Updates to internal usage of style variables creating more flexibility in theming
- Adds load date and days to load columns to fdot attributes grid
- Citation points color by attribute and can be adjusted in map legend
- Crash calendar chart allows user to adjust hourly groupings
- Adds more loading indicators while map operations are in progress
- Additional citation charts added
- Updates bottom bar counts to use geolocation status
- More dynamic attributes in crash charts
- User redirected to home page when authentication cookie has expired

BUGS SQUASHED

- Fixes chart columns using incorrect colors when traveling upwards from a drilldown
- Corrects issue for users with RDA from parent agencies who were unable to issue queries
- Addresses bug preventing user managers from approving new account requests
- Corrects broken link when a logged in user requests a new account
